WHAT IS EUSKELEC?

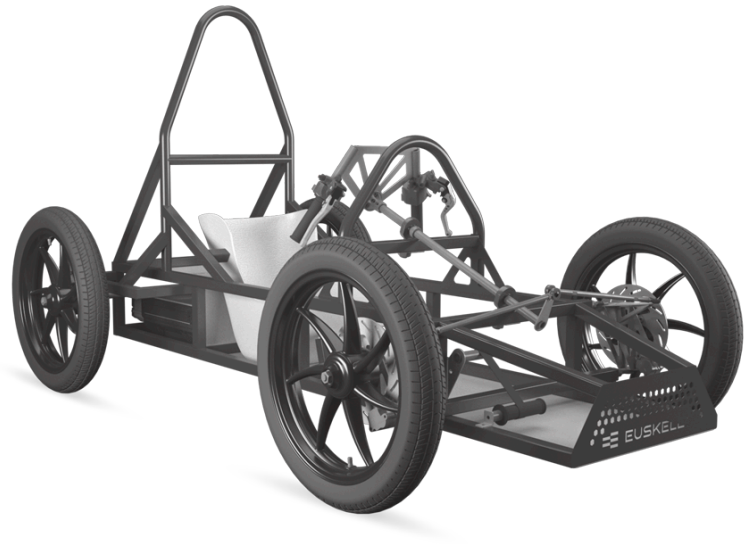

Electric vehicles built by vocational training students

Euskelec is a competition in which students from vocational training centres in the Basque Country design and build **a 100% electric vehicle** using the same driving base: motor, motor controller and batteries.

The goal is to encourage students to work as a team and to establish experimentation and creation as a teaching strategy for imparting technical knowledge of electric vehicles.

KEY FACTS

2 phases	**5** dynamic tests	**100%** electric	**25** schools in the 8th edition

COMPETITION

Two phases

PHASE 1

Technical and creative aspects

A presentation detailing the work undertaken on the Euskelec project by the participating teams and how the project has evolved, compiled in a project report and presented before an expert panel.

WHEN **Coming soon** · WHERE **Coming soon**

PHASE 2

Dynamic testing event

The performance, features and design of the vehicles are assessed via slalom, acceleration, maximum braking and resistance tests.

WHEN **Coming soon** · WHERE **Coming soon**

PHASE 2 · DYNAMIC TESTS

- Acceleration test
- Slalom test
- Braking test
- Classification
- Resistance test

LAST EDITION

Euskelec IX · Vitoria-Gasteiz

16 and 17 May, in the Virgen Blanca square.

- **16 May** (11:00-18:00): team reception and official checks.
- **17 May** (10:00-15:00): dynamic tests, race and prize-giving.
